# X-Rite Link

## Stay Connected to Maximize Workflow Performance and Efficiency

X-Rite Link is an innovative web-based platform that provides the data you need to achieve optimal performance, whether you own one X-Rite device or an entire fleet. It provides real-time insight into your color measurement devices to reduce manual management, ensure optimal performance, and streamline the service process. Stay connected to your devices so you can have confidence in every measurement.

### Gain Real-Time Insights

Have clear visibility to all X-Rite devices:
- Certification status
- Service Care Plan and warranty expiration
- Map view of device locations

### Enable Data-Driven Decisions

- View up-to-date device performance
- Know which devices require service
- Initiate service requests directly from X-Rite Link
- Access historical service records
- Track monthly calibration reports

### Improve Business Performance

- Single source for local and fleet data
- Ensure device performance to reduce color error
- Maintain ISO:9001 compliance with quick access to NetProfiler certificates of performance
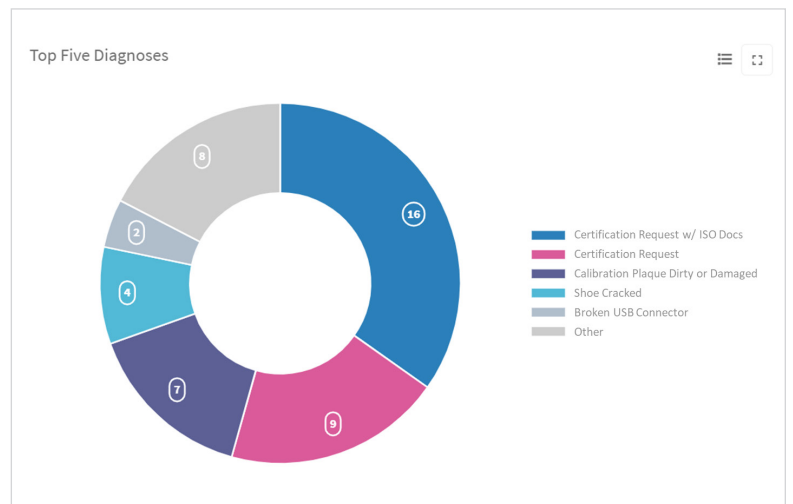

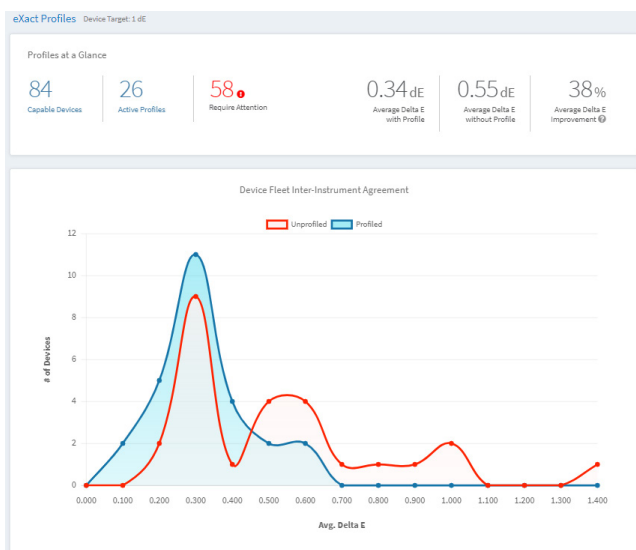

# Have Complete Control

X-Rite Link empowers users with complete control of their X-Rite devices, increasing uptime through real time device insights, enhanced asset management, and customizable user permissions.

---

## The Optimal Solution for Fleet Management

### NetProfiler Statistics Dashboard

- Quantify inter-instrument agreement improvement
- Identify devices that require attention
- Download certificates of performance

### Service Record Dashboard

- Centralized visibility and real-time status of service records
- Live shipping updates
- Top diagnosis reasons and volume of serviced devices
